PROFILE

Bachelor of Computer Applications graduate from The CVM University with strong hands-on experience building web, mobile, database-driven, and game-development projects. Developed end-to-end academic systems involving authentication, relational databases, validation, user-interface design, and application workflows. Currently extending this project-focused background through independent game development using Unity, C#, Blender, and Android-oriented development workflows.

EDUCATION

Bachelor of Computer Applications (BCA)

S.G.M. English Medium College of Commerce and Management (SEMCOM), CVM University | Vallabh Vidyanagar, Gujarat, India | 2022-2025

CGPA: 9.42 / 10 | Percentage: 89.2% (as per CVM University grading system)

Academic foundation in programming, web development, databases, software development, and data-structure fundamentals.

TECHNICAL SKILLS

Primary programming: C#, PHP, JavaScript, Dart, VB.NET

Foundational programming: C++, Java, Python

Web & mobile: HTML, CSS, ASP.NET, Flutter

Databases: MySQL, Microsoft SQL Server, SQLite

Game & 3D development: Unity, Unity Input System, Universal Render Pipeline (URP), Blender, UV mapping, PBR materials, texturing, baking

2D Graphics & Animation: Synfig Studio, 2D Asset Creation, Basic Keyframe Animation

Development tools & platforms: Visual Studio, Visual Studio Code, Git/GitHub, Android Studio, Android, Windows, Web

TECHNICAL PROJECTS

Frolison Waterways - 3D Mobile Endless Runner

Independent Game Development Project | Unity, C#, Blender | May 2026 - Present

- Developing an Android-focused 3D endless-runner game based on boat navigation through dynamically generated waterways.
- Implemented automatic forward movement, three-lane navigation, swipe controls, collision/game-over systems, and a smooth chase-camera workflow.
- Built reusable environment segments with randomized spawning, destruction logic, and safeguards against repetitive consecutive segments.
- Established a complete Blender-to-Unity asset pipeline covering modelling, UV mapping, PBR materials/textures, baking, FBX export, prefabs, lighting, and optimization.
- Built and tested the Android deployment pipeline on physical mobile hardware, with attention to texture compression, mipmapping, polygon budgets, LOD planning, and mobile rendering performance.

TECHNICAL PROJECTS - CONTINUED

Savvy.shop - Multi-Role E-Commerce Platform | GitHub ↗

BCA Semester VI Project | HTML, CSS, JavaScript, PHP, MySQL | 2024-2025

- Developing a multi-role e-commerce platform for customers, vendors, administrators, and delivery personnel, with product browsing, carts, ordering, reviews, inventory, delivery, and reporting workflows.
- Implemented strict JavaScript regex validation, bcrypt password hashing, encoded product links/redirect handling, and a PHP/MySQL relational backend.

Skroll - Social Media Platform | GitHub ↗

BCA Semester V Project | ASP.NET, Visual Basics, Microsoft SQL Server, HTML, CSS, JavaScript | 2024

- Built an Instagram-inspired social platform with validated authentication, profiles, image/video posts, feeds, follow/unfollow, search, and notifications.
- Designed and integrated SQL Server data structures for users, posts, social relationships, likes, and comments.

Stint22 - Task Management System | GitHub ↗

BCA Semester IV Project | HTML, CSS, JavaScript, PHP, MySQL | 2023-2024

- Built a PHP/MySQL task-management system with authentication, task CRUD, scheduling, team creation, member management, collaborative assignment, and reporting.
- Supported Business, Teacher, and Student user categories with category-specific dashboards and task organization.

Space22 - 2D Space Fighter Game

Independent Game Development Project | Two playable levels | June 2025

- Created a two-level 2D space-combat game with player movement, enemy encounters, combat mechanics, and level progression.

HACKATHON PROJECTS

Alumni Association Platform - CodeManthan 1.0

Team Project | ASP.NET, Visual Basics, Microsoft SQL Server, HTML, CSS, JavaScript | BCA Semester V

- Built a college-alumni portal in a team hackathon, contributing UI, authentication, profiles, dashboards, database work, and validation.
- Implemented core workflows including events, jobs, alumni search, donations, invitations, ratings, reviews, and feedback within the hackathon timeframe.

Small-Business Billing & Inventory Application - CVMU Hackathon 3.0

Team Project | Flutter, Dart, PHP, SQLite | BCA Semester VI

- Developed an offline-capable Flutter billing and inventory app for small businesses with reusable item records and adjustable pricing/discounts.
- Implemented inventory management, bill-history filtering, and WhatsApp bill sharing.

AWARDS & ACHIEVEMENT

Jewel of the SEMCOM

SEMCOM, CVM University | April 2025

Awarded for excellent performance in academic and co-curricular activities at the university and college.
