Technical Skills

Primary Programming
C#, PHP, JavaScript, VB.NET

Foundational Programming
C++, Java, Python

Web & Mobile
HTML, CSS, ASP.NET, Flutter

Databases
MySQL, MSSQL Server, SQLite

Game & 3D
Unity, URP, Blender, UV Mapping, PBR Materials, Texturing, Baking.

Tools
Visual Studio, Visual Studio Code, Git/GitHub, Android Studio, Android, Windows, Web

Achievement & Languages

Jewel of SEMCOM
SEMCOM, CVM University | April 2025
Awarded for excellent performance in academic and co-curricular activities.

Languages
Gujarati : Native
English : Proficient
Hindi : Fluent

Profile

Bachelor of Computer Applications graduate from The CVM University with hands-on experience in web, mobile, database, and game-development projects. Built end-to-end applications involving authentication, relational databases, validation, and application workflows. Currently focused on independent game development using Unity, C#, Blender, and Android workflows.

Education

Bachelor of Computer Applications (BCA)

S.G.M English Medium College of Commerce & Management (SEMCOM)
CVM University | V.V.Nagar, Anand, Gujarat, India | 2022 – 2025
CGPA: 9.42/10 | Percentage: 89.2%

Projects

Frolison Waterways – 3D Mobile Endless Runner

Independent Game | Unity, C#, Blender | May 2026 - Present

- Developed an Android-focused 3D endless runner featuring boat navigation, dynamic waterways, three-lane movement, swipe controls, collisions, and chase-camera gameplay.
- Built reusable randomized environment segments and a Blender-to-Unity asset pipeline covering modelling, UVs, PBR materials, texturing, FBX export, prefabs, and lighting.
- Built and tested the Android deployment pipeline on physical hardware, focusing on texture compression, polygon budgets, LODs, and mobile optimization.

Savvy.shop – Multi-Role E-Commerce Platform

BCA Sem VI | HTML, CSS, JavaScript, PHP, MySQL Server | 2024 - 2025

- Developed a multi-role e-commerce platform for customers, vendors, administrators, and delivery personnel, with product browsing, carts, ordering, reviews, inventory, delivery, and reporting workflows.
- Implemented strict JavaScript regex validation, bcrypt password hashing, encoded product links and redirect handling, and a PHP/MySQL relational backend.
- **GitHub ↗**

Skroll – Social Media Platform

BCA Sem V | ASP.NET, VB.NET, MSSQL, HTML, CSS, JavaScript | 2024

- Built an Instagram-inspired social platform with authentication, profiles, image/video posts, feeds, follow/unfollow, search, notifications, likes, and comments.
- Designed and integrated SQL Server data structures for users, posts, social relationships, likes, and comments.
- **GitHub ↗**

Stint22 – Task Management System

BCA Sem IV | HTML, CSS, JavaScript, PHP, MySQL | 2023 - 2024

- Built a PHP/MySQL task-management system with authentication, task CRUD, scheduling, team creation, member management, collaborative assignment, and reporting.
- Supported Business, Teacher, and Student user categories with category-specific dashboards and task organization.
